THE DESIGN HOTELS™ BOOK

GO WITH THE TIMES

CLASSIC, IN A NEW COMPOSITION

To live classically, one has to be a traditionalist. Whether clothing, car, music, or furniture, classic fans around the world are united by their enthusiasm for craftsmanship and authenticity, for true values and timeless elegance. And originality is sought after just as much as original pieces. Those who move in different cultural circles find that classic is in the process of developing into a new and versatile style of life – and most particularly in interior design. It may be characterized by worldly elegance or minimalism, opulence or restraint. It may be conscious of tradition, or it may transcend all boundaries. No matter what, it is more individual than ever before – and is therefore experiencing an impressive renaissance.

KITCHENS FOR A NEW EPOCH

WELCOME TO THE CLASSIC WORLD OF SIEMATIC

Whatever you like is what is allowed. It's the motto that guides *SieMatic* in working with illustrious international designers to create room concepts for the *SieMatic* CLASSIC collection, whose options extend far beyond the realm of traditional kitchen design. These concepts make it possible to play with styles and to utilize seemingly contradictory design elements to compose a harmonious whole, to the delight of all who seek to elegantly combine the old values and the new. And those whose demanding sense of aesthetics does not fit into classic "pigeonholes." Get to know the world of *SieMatic* CLASSIC, and discover the most beautiful furnishing style for the kitchen: your own.

THE BEST INGREDIENTS FOR PLANNING AND DESIGN

COMPOSE YOUR KITCHEN A LA CARTE

Between the individualized options provided by *SieMatic* design concepts and the expertise of your SieMatic specialist, you can find the perfect combinations in the *SieMatic* CLASSIC collection to suit your taste: matte or glossy surfaces, light or dark materials, smooth or contoured door fronts, and with or without handles. Stark contrasts, door fronts with faceted frames, and symmetrical furniture arrangements are classic interior design themes that *SieMatic* has given a completely new, modern spin, with the bold shapes of cabinets in a matte black tone from the *SieMatic Individual ColorSystem* as well as the stainless steel countertop and side panels in a 1 cm look elegantly enveloping the island.

The small tea and coffee station remains out of sight when not in use. The practical cabinets are completely embedded into the wall and equipped with double pocket doors. Flanked on both sides are tall cabinets whose functions – including spacious refrigerators and freezers – are just as discreetly hidden behind smooth front panels.

COMFORT AND ELEGANCE

A FURNITURE GEM IN THE KITCHEN

One signature piece in the SieMatic CLASSIC collection is the unique, minimalistic interpretation of the classic Chinese wedding cabinet. Against the exquisite *"Black Oak"* veneer, hardware, handles and knobs in *"Polished Nickel"* create gleaming highlights. This expressive freestanding piece lends an elegant air and ease to any kitchen. Its appeal is not only aesthetic, but functional: Behind its decorative exterior, it can conceal a spacious china cabinet, pantry storage or a convenient refrigerator-freezer combination.

"TRADITION IS NOT THE WORSHIP OF ASHES
BUT THE PASSING OF THE FLAME."

GUSTAV MAHLER
Composer, 1860–1911

DOING MORE WITH LESS

IT IS NOT THE SIZE THAT COUNTS, BUT THE IDEA

The *SieMatic* CLASSIC collection offers options that go far beyond the usual in kitchen design with truly unlimited creative freedom – no matter your space or budget. This example illustrates how sophisticated ideas and *SieMatic* design elements can be used to create a high-quality, impressive and individual space with just a few pieces: warm *"Graphite Gray"* was chosen from the *SieMatic ColorSystem,* while the island showcases a countertop in noble *"Bianco Carrara"* marble and Ceramic in *"Pulpis"* giving the backsplash an elegant air. Metallic details in *"Gold Bronze"* like the wall rack, handles, fine edging on the exhaust hood, and the countertop frame create attractive accents and give the kitchen a brilliant shine.

MORE IDEAS PER M²

EXPAND YOUR CREATIVE OPTIONS

Classic, timelessly elegant style and symmetric arrangements characterize this room concept, which also features mindful repetition of color and materials. The stove area forms a focal point with its silky matte lacquered base cabinets in *"Graphite Gray"* and exhaust hood in *"Lotus White."* Continuous metal edging in *"Gold Bronze"* subtly accentuates handles, fittings, and countertop edge. The subdued shine of these lines builds a delicate contrast to the size of the range and the island opposite. Cleverly integrated into a simulated doorway is a refrigerator-freezer combination. Elegantly concealed with door trim and with door fronts in *"Graphite Gray,"* the element blends perfectly with the surrounding architecture.

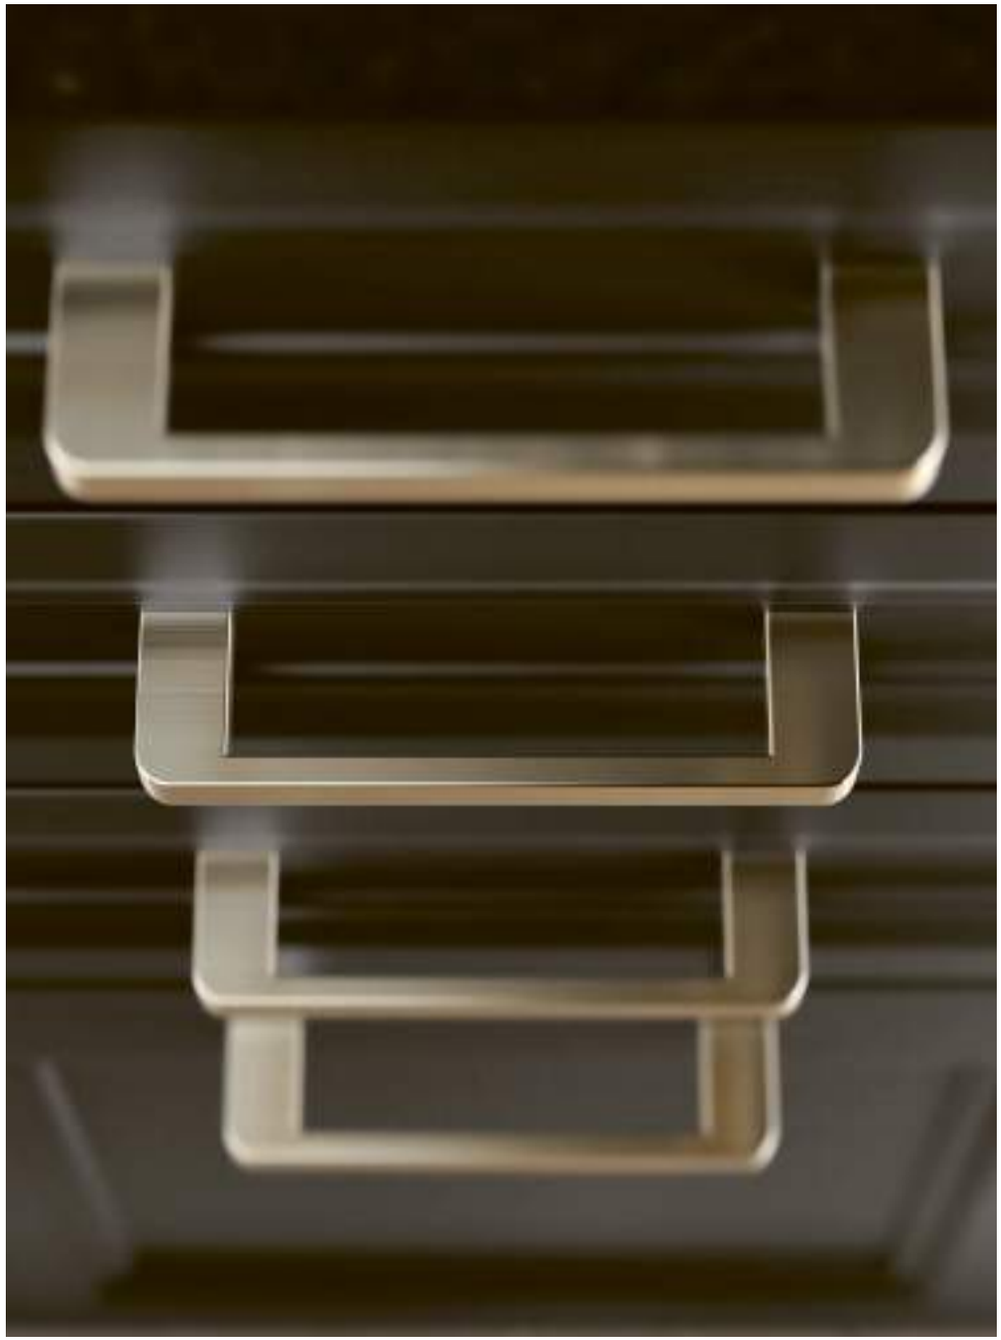
BRILLIANT DESIGN

METALLIC HUES AS AN ACCENT

Stainless steel countertops are not the only option available: *SieMatic* offers a wide selection of smaller, delicate elements whose attractive metallic hues lend a special luster to classic kitchens. Whether faceted drawer fronts, shelves, glass cabinet doors, countertops, side panels, exhaust hoods, *StoneDesign* countertop edges, handles, or recessed handle channels; whether glossy, silky matte, or brushed; whether in *"Gold Bronze," "Nickel,"* or *"Black"* – at *SieMatic,* you will find an enormous spectrum to make your ideas shine.

GLASS CABINETS

In exquisite "Gold Bronze," "Matte Black," "Nickel Gloss," or "Brushed Nickel," with or without interior lighting: an eye-catching addition to any kitchen.



HANDLES

SieMatic handles in "Gold Bronze," "Nickel," "Matte Black," or "Stainless Steel" are available in a variety of shapes and sizes.

GLASS METAL SHELVES

Available in "Matte Black," silk gloss "Gold Bronze," or "Nickel Gloss" and in various sizes to create a casually elegant mix in any arrangement.

LIGHT METAL EDGES

An attractive accent in "Matte Black" or "Gold Bronze," these edges provide a particularly elegant frame for countertops in SieMatic StoneDesign.

FROM MINIMALIST TO STRIKING

THE KITCHEN AS REFLECTION OF PERSONALITY

The opulence of this room and the decor of the walls cry out for extroverted furnishings. Intentional contrasts pervade the design of the cooking area, with profiled base cabinets in matte stainless steel and high-gloss black SQ lacquer. Attractive accents are found in the faceted pullout door frames in *"Polished Nickel,"* with an elegant shine that is reflected in the polished frames of glass doors in wall and tall cabinets.

SHINE WITH NEW IDEAS

HOW TO BREAK THE RULES OF STYLE IN AN ELEGANT WAY

This *SieMatic BeauxArts* interpretation of the classic kitchen presents a surprising and unconventional combination of opposing style elements: traditional and modern, ornamental and minimalist, matte and glossy, delicate and heavy. Black marble in the niche creates an elegant shimmer whilst framing and accentuating the cooking area. The balanced interplay of the high-quality materials underscores an impressive ambience.

UNIQUELY VERSATILE

HARMONIOUS PAIRING OF OUTER AND INNER VALUE

SieMatic kitchens embody love of detail, the measure of perfection, and the value of quality materials. That goes for the surfaces of the cabinet elements as well as their inner life. Behind every door and every pullout, *SieMatic* reveals a perfect world: material combinations that ensure a fascinating balance of form and color between interior and exterior.

INSIDE AND OUT, PURE HARMONY

SIEMATIC ALUMINUM INTERIOR ACCESSORIES

An aesthetic treat that is unique in its functionality and unmistakable in its graphical look. It was created with the innovative new material combination of aluminum, light oak or dark smoked chestnut, flock, and porcelain, as well as precise workmanship down to the smallest detail. Intelligent, contemporary ideas, like the integrated USB connection, offer valuable functions for the kitchen. The highly flexible *SieMatic Interior Design System* makes it possible to arrange and equip the drawers and pullouts in a way that could not be more individual, and it has won a number of awards for its unique design.

Sophisticated smoked chestnut: The dark chestnut wood is darkened by smoking, not just superficially varnished or painted, in order to achieve a fine patina over the long life of a SieMatic, without light-colored scratches.

reddot award 2014 winner · iF product design award 2014 · BEST OF YEAR 2014 · Interior Awards 2014

EVERYONE IS DIFFERENT.

BETTER SAFE THAN SORRY

The GripDeck drawer bottom provides elegant protection against scratches and keeps pots from sliding.

DRAWERS YOU CAN LOAD UP

Drawers with an integrated USB charging station keep tablets and smartphones out of the way.

UNLIMITED POSSIBILITIES

With their versatile furnishing elements, drawers offer room for supplies and tall items.

SO IS EVERY SIEMATIC.

WIDE-RANGING SELECTION
The variability of the system elements creates nearly infinite options for arrangement.

A GOOD MIXTURE
A block for sharp knives of any length, spice mills, and transparent jars.

NEAT SOLUTION
If you want to turn the kitchen into living space, you will want to store more than cooking utensils there.

CREATE YOUR OWN COMPOSITIONS

FORM FOLLOWS FUNCTION – AND FORM FOLLOWS FEELINGS

Classic or modern, lacquer or stainless steel, matte or glossy? Why "or"?
In the *SieMatic* CLASSIC style collection, you can compose seeming contradictions into a harmonious whole to create your individual, sensational combinations of the classic kitchen. Just follow your own sense of style.

EASY ACCESS

Delicate handles in polished "Nickel Gloss" underscore the traditional charm of elaborate mouldings on drawers, pullouts, and doors.

SHINE AND TRANSPARENCY

Tall glass cabinets that extend nearly to the ceiling feature frames in various metallic hues and space for items that call for being on exhibit, not hidden.

BOTH WALL AND CABINET

Illuminated glass shelves are found behind sliding doors made of premium natural or artificial stone. Visually massive; surprisingly easy to slide.

EVERYTHING IN THE RIGHT LIGHT

Perfect lighting that helps you work or sets the mood, along with outlets where you need them, but out of sight: Our different SieMatic Lighting Systems always get the job done.

COMPETENT CONSULTING AND PROFESSIONAL PLANNING

A VISIT THAT GIVES YOU A NEW PERSPECTIVE

SieMatic is at home anywhere. In apartments and lofts, row houses and villas, great metropolises and rural regions, and in 60 nations around the world. Wherever you encounter the name *SieMatic,* you will get a comprehensive picture of what is recognized as timelessly elegant kitchen design and the best combination of master craftsmanship and state-of-the art technology because your *SieMatic* specialist is always up to date on current aspects of interior design and technical innovation. He or she is also an expert listener, who makes wishes come true and shows you new perspectives.

Your *SieMatic* specialist is looking forward to your visit. The fastest way to get there:

SIEMATIC MULTIMATIC

ORGANIZING YOUR HOME HAS NEVER BEEN SO MUCH FUN

With *MultiMatic,* the design philosophy of the *SieMatic Interior Design System* has been applied consistently for drawers and pullouts in tall, wall, and base cabinets. This highly flexible interior organization system exclusive to the *SieMatic Interior Design System* offers the same aesthetic pleasure created by an elegant combination of materials such as high-quality aluminum, rich woods, and fine porcelain – while also offering many new functions perfected down to the last detail, giving you up to 30% more storage space.

iF DESIGN AWARD 2015 · interior innovation award 2015 Winner · reddot design award winner 2015

A PLACE FOR EVERYTHING

Your lovely little treasures can rest in individually sub-dividable trays, on dark smoked chestnut or light oak.

GREATNESS ON A SMALL SCALE

Precision, elegance, and creativity are found in MultiMatic Aluminum interior furnishings, even in the smallest detail.

VERY RESPONSIVE

Consistent design language is also reflected in storage cabinets whose adjustable interior drawers move forward automatically when the doors are opened.

ALL AT A GLANCE

Clearly arranged, practical "apothecary's cabinets" are available in widths of 30 and 45 cm and in all SieMatic door front colors and materials.

Together with Mick De Giulio, who is celebrated in the USA as the "Rock Star of Kitchen Design," *SieMatic* has developed a new composition of the classic kitchen that expands latitude for design by adding unconventional ideas: the room planning concept *BeauxArts,* named for the architectural style of the same name, which also broke away from the usual rules. What's permitted is anything that pleases, because playing with styles and volumes, colors and materials, symmetry and asymmetry is part of the program.

"A GREAT KITCHEN HAS A MAGIC TO IT
THAT TRANSFORMS THE PHYSICAL ROOM INTO A FEELING.
PEOPLE ARE DRAWN TO THAT KITCHEN, AND
THEY MAY NOT KNOW WHY. THE KITCHEN SINGS.
IT IS MY JOB TO WRITE THE MUSIC."

MICK DE GIULIO
Designer, Chicago, USA

THIS IS HOW YOUR KITCHEN BECOMES UNIQUE

WRITE YOUR OWN CHAPTER IN THE HISTORY OF KITCHEN DESIGN

Pure elegance and a cozy, welcoming atmosphere are not contradictions. Because *SieMatic* CLASSIC stands for sensitive design with extravagant elements: Glass and shine ensure lightness and transparency; profiled front panels convey a classic aesthetic. By combining the fine design sense of your *SieMatic* specialist with your own personal ideas, this mix of styles achieves a unique and timelessly elegant look.

PREFERRING THE BEST

THE MOST BEAUTIFUL COMBINATION OF OLD AND NEW VALUES

If you're searching for something special, you will soon discover the dedication and love of detail with which each and every *SieMatic* item is developed and produced. The result is a perfect combination of master craftsmanship and modern industrial manufacturing – which you can both see and feel.

SieMatic

DOES KITCHEN FURNITURE HAVE TO LOOK LIKE KITCHEN FURNITURE?

SET YOURSELF FREE FROM DESIGN DICTATES

SieMatic CLASSIC inspires new views of the classics. Discover a collection of extraordinary furniture elements that can be used to interpret the classic kitchen in many different ways to create artful accents. The “Chinese wedding cabinet,” for example, acts not only as a charming eye catcher; it also has a surprising inner life. Behind its decorative exterior, it can conceal a generous china cabinet or a state-of-the-art, convenient refrigerator-freezer combination.

A sophisticated play on bold contrasts – a characteristic design feature of the CLASSIC SieMatic style collection – also reveals its effect in smaller rooms. The kitchen's predominantly light color scheme with sweeping countertops and wall paneling in *"Bianco Carrara"* marble and satin matte SQ lacquer in *"Sterling Gray"* is skilfully highlighted through dark accents, such as the handles and wall cabinets in *"Black Matte Brushed Aluminum"* and glass in *"Parsol Gray"*.

The Chinese wedding cabinet, the signature piece of the *SieMatic* CLASSIC style collection, offers ample storage, as can be seen in the china cabinet version shown here. With the elegant *"Black Oak"* veneer inside and out and hardware, handles and knobs in *"polished nickel",* the SieMatic aluminum interior accessories in *"Smoked Chestnut"* create a perfectly harmonious look. The countless system elements enable the highly customized arrangement and equipment of pullouts and internal drawers.

NOT JUST FOR ORDER'S SAKE

WOODEN INTERIOR ACCESSORIES

The material combination of the *SieMatic wood interior accessories,* winner of design awards, looks like it was "cast from a single mold": light oak, aluminum, and porcelain; elegantly connected by a light shade of gray. If you love natural, warm, and cozy; if you value precise workmanship; and if you appreciate a broad range of individual options, then you will enjoy a feast for the eyes every time you open a drawer. The *SieMatic wood interior accessories* system encompasses many elements that are as practical as they are decorative, including stackable porcelain jars and wooden boxes in various heights that can be labeled and re-labeled in pencil and provide optimal utilization of storage space, as well as the matching *GripDeck,* which keeps pots, pans, and large boxes of supplies from slipping.

Flour

THE FAR REACHES OF CANADA

NEVER HAS CLASSIC BEEN SO MODERN

Evoking the region, the richly voluminous island for this domicile on the outskirts of Ottawa creates a counterpoint to the bright, gleaming design of the lavishly spacious room. The concentration of white as the predominant color, paired with smoked oak veneer, combines traditional and modern elements, matte and glossy surfaces, cooking and living areas.

THE CENTRAL ELEMENT IS INDIVIDUALITY

GENEROUS ROOMS, GRAND DESIGNS

White cabinet elements, integrated with white walls and white furniture, which remain elegantly understated: The sensitive use of light, soft tones fuses the entire area into a unit, thus emphasizing the scale of the architecture. A clear contrast is provided by the vivid materials and colors of the opulent island and the classically designed, symmetrically arranged cooking area, which thus become the clear focus. The massive stainless steel stove and polished stainless steel hood create attractive, gleaming highlights.

An elegant transition to the living area is created by the tall cabinet units integrated in the wall, complete with glass doors, frames in *"Glossy Nickel"*, glass shelving and an interior lined in sophisticated *"Smoked Oak"* veneer, which echoes the warm, dark wood hues of the island.

TIMELESSNESS FOR THE FUTURE

QUALITY IS THE BEST FORM OF SUSTAINABILITY

We have always felt a deep sense of responsibility towards our environment and future generations. This is why strict environmental regulations have always been a matter of course in the development of our products, the selection of our materials, our transport routes and the production of our kitchen furniture. They often go far beyond the standard for the industry. We regularly have them checked and certified by neutral and reputable bodies, from the stringent FSC™ certification to the high standards of the US CARB II standard *(TSCA Title VI).* But we also make an equally important contribution to sustainability with our high quality standard. Every SieMatic kitchen that leaves our factory is built for decades of use. This starts with even the tiniest screw and hinge, which have to pass the toughest load tests in our own testing laboratory. And it culminates in the timeless design of our kitchens, which transcends generations and thus sustainably conserves resources.

THE SIEMATIC COLORSYSTEM

THE ART OF SETTING THE RIGHT TONE

Color is one of the most important design elements in interior design, because it spontaneously creates moods and feelings. The choice of colors determines whether a room is perceived as inviting, elegant, open, cool, or cozy. Achieving a nuanced combination of the different materials and door panels used in a kitchen and creating the desired harmony require not only a highly sensitive use of colors but also a well conceived concept. That is why the *SieMatic ColorSystem* was developed. Available in a range of attractive matte and glossy colors, which make it possible to combine the *SieMatic* furniture elements across all collections. Furthermore, in the area of SQ lacquer, the 1,950 individually selectable satin matte and glossy hues of the *SieMatic Individual ColorSystem* are also available.

GLEAMING QUALITIES, INCLUDING MATTE

SQ LACQUER SURFACES

Nowhere is furniture subject to more stress than in the kitchen. It is for this reason that, particularly there, materials of select quality and perfect workmanship should be used. With the *SieMatic* CLASSIC lacquer programs, home furnishings radiate elegance without offering any point of vulnerability to the high stresses of the kitchen. This is because the exclusive *SieMatic SQ lacquer front panels* are manufactured in "Superior Quality," in an innovative lacquer finishing process that provides for the greatest flexibility in planning and guarantees environmentally friendly, first-class quality "made in Germany." The *SieMatic AntiPrint* coating prevents fingerprints, even on silky matte lacquered surfaces.

THE MOST ELEGANT WAY TO SPEND LESS

SIMILAQUE SURFACES

An alternative in look and price to the exclusive *SieMatic SQ lacquered front panels* is provided by the *SieMatic SimiLaque front panels* in *"high-gloss"* or *"silky matte,"* which also have an elegant, high-quality look. Here, too, the *SieMatic AntiPrint* coating prevents fingerprints, even on silky matte lacquered surfaces.

A MATERIAL WITH MANY GOOD SIDES

LAMINATE SURFACES

SieMatic furniture front panels in direct plastic coating or HPL are also available in matte and glossy; they are highly durable, extremely easy to care for and hygienic. They have a flawless, high-quality look and an astonishingly natural effect in designs such as *"Java Oak," "Onyx Oak"* and *"Larix Terra"*.

FROM NATURE TO THE KITCHEN

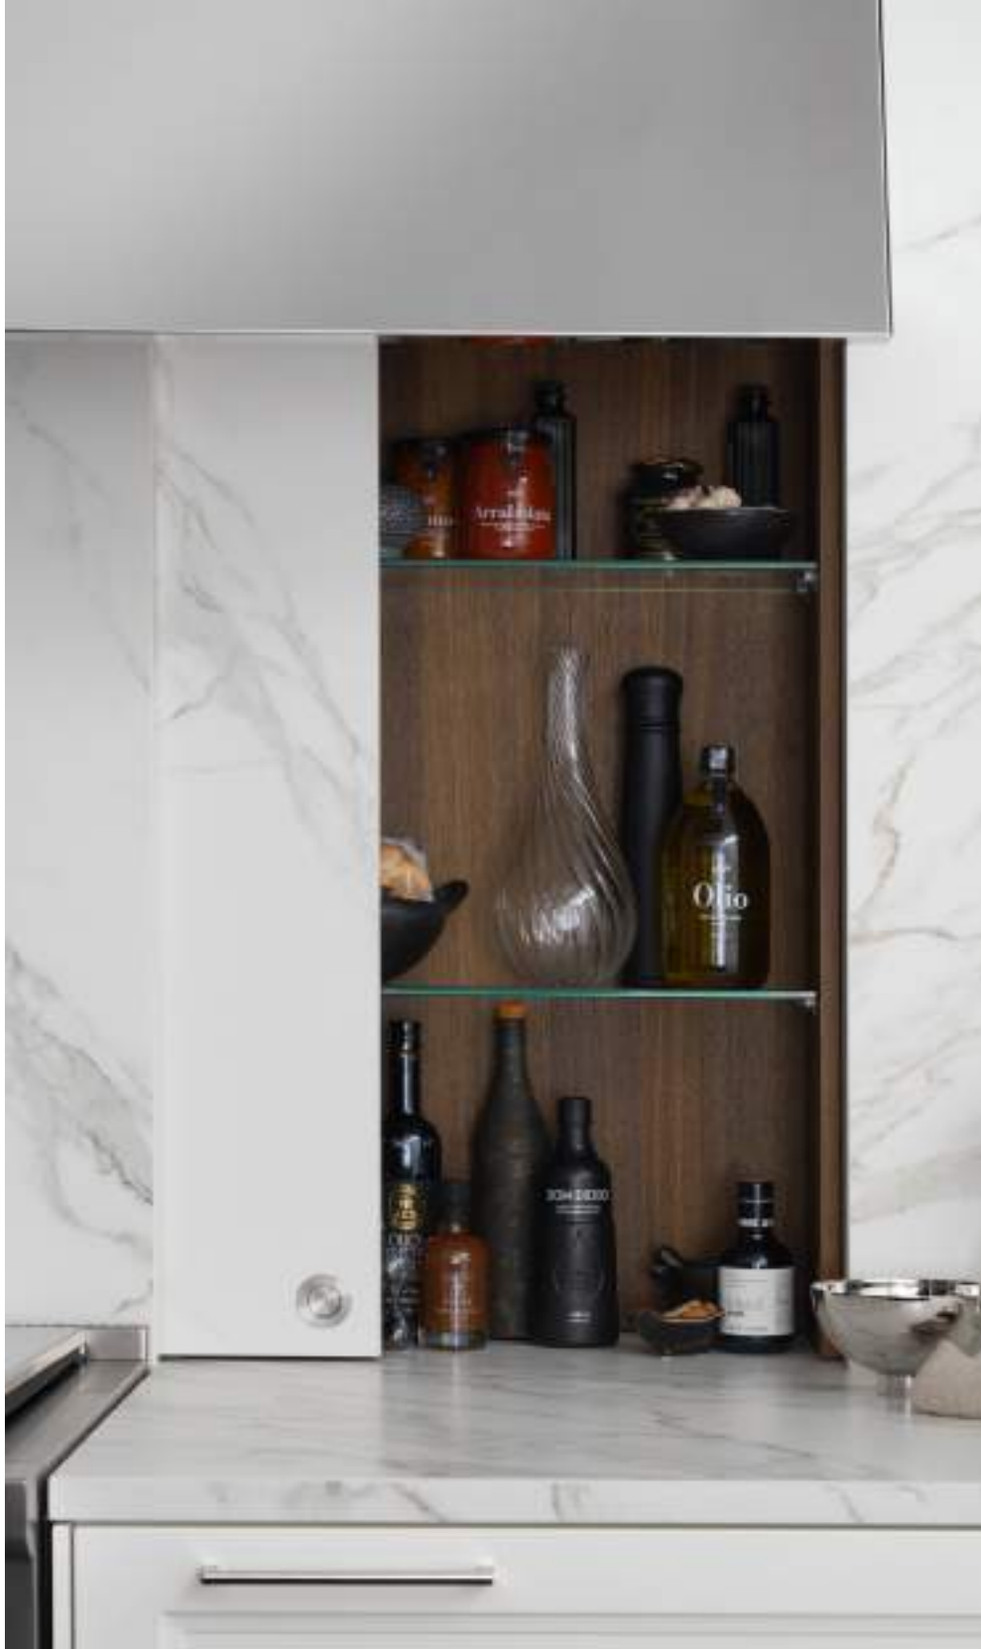
WOOD SURFACES

As a surface material, wood still continues to enjoy great popularity, because it exudes natural warmth like no other material. Front panel or veneer, *"matte"* or *"glossy"*: *SieMatic Kitchen Interior Design* offers a great variety of woods. Particularly expressive varieties with a continuous veneer pattern give surface design the character of master craftsmanship.

COUNTERTOPS AND NICHES AS DESIGN ELEMENTS

EVERY MATERIAL HAS ITS PARTICULAR QUALITIES

In kitchen design, the appearance and nature of the countertops play an essential role. Whether homey or practical, impressive or functional – the selection of the countertop and niche material can serve the contrasting design of a classic kitchen, emphasize the cooking area, or achieve a harmonious color scheme in the overall design. The range of high-quality countertop designs is extraordinarily high at *SieMatic* – from the material, to the thickness, to the design of the edge, you have the freedom of choice. Whichever you choose: Even the most extravagant material is refined to such a degree at *SieMatic* that it is suitable for the most intense demands in the kitchen.



EXCLUSIVE

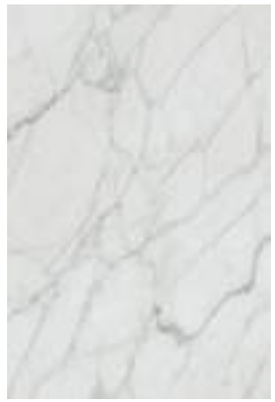
NATURAL STONE

Whether marble, granite, limestone or volcanic stone, the particular charm of natural stone countertops lies in the irregularity of their surface, which distinguishes them distinctly from industrially manufactured materials.

IMPRESSIVE

COMPOSITE STONE

Composite stones consist of more than 90% natural quartz, to which resins and colorings are added. Although comparable in hardness and density to natural stone, they always have uniform surface colors and structures.



DURABLE

CERAMIC

Ceramic is a homogeneous, hard material, in a single color or with a natural, marble-like look. The fired surface is impervious to water, can be recycled, and is absolutely food-safe, so that no impregnation is required. In addition, it is incredibly scratchproof, acid-resistant, and easy to care for.

PROFESSIONAL

STAINLESS STEEL

Stainless steel is a tough, hygienic material, whose professional appeal is not impaired by the traces of use; it gets even more beautiful as time goes by. Whether as a complete countertop or as a design accent.

VERSATILE

LAMINATE

SieMatic laminate countertops have a very resistant, hygienic surface of layered material and are available in a wide selection of decors and edge designs, which permits harmonious color choices that are perfectly attuned to the front panels and surrounding elements.

SIEMATIC STONEDESIGN

EXCLUSIVE COUNTERTOPS AND NICHE PANELS

Countertops and niche panels of real natural or composite stone are timelessly beautiful, incomparably elegant, and enhance the character of a kitchen. However, countertops of massive stone are usually offered by their manufacturers only in a few designs. In contrast, *SieMatic StoneDesign* offers numerous variants to expand planning latitude. This is because these countertops are made of a lightweight base material with a 1 cm thick layer of granite, marble, limestone, volcanic rock or composite stone. This way, countertops are manufactured in thicknesses, lengths and surfaces without joints that would otherwise literally be virtually intolerable – allowing numerous design alternatives. *SieMatic* countertops in thicknesses from 6.5 to 140 mm are not only available in many different types of stone, but also with different edge designs: in elliptical form, mitred, with a metal edge and in popular 1 cm optic or with the particularly fine 6.5 mm edge.

And, of course, SieMatic Kitchen Interior Design offers you a wide selection of variants in stainless steel, ceramic and high-quality laminate, which can also be combined well with *SieMatic StoneDesign*.

THE EDGE DESIGNS FOR SIEMATIC STONEDESIGN

MANY THICKNESSES, MANY OPTIONS

6.5-MM LOOK

With a visible thickness of just 6.5 mm, the SieMatic StoneDesign countertops bring an air of captivating weightlessness. Its delicate lines underscore the elegance of purist design.

1-CM LOOK

Its delicate charm is created by the mere 1 cm thickness of the stone surface, combined with an invisible support structure, which ensures great stability and makes it possible to utilize every kind of stovetop and sink.

MITERED EDGE

The mitered and bonded sheets and edges give the appearance of a massive countertop 3 to 14 cm thick, to showcase the full beauty of the high-quality stone.

ELLIPTICAL EDGE

The polished surface of the edge is created in a complex, high-precision, surface finishing process. Its decorative character further underscores the elegance of the countertop.

METAL EDGE

Edge designs in brushed "Matte Black" or "Gold Bronze" are particularly rich accents that can be elegantly combined with other metallic elements.
