

The background of the entire page is a textured, aged, light brown paper. It features faint, light-colored pencil sketches of various architectural elements. On the left side, there are sketches of ornate, symmetrical scrollwork and floral motifs. On the right side, there are sketches of architectural details, including what appears to be a section of a building with a sloped roof and a chimney, and some circular patterns at the bottom right.

La rivisitazione dei periodi migliori della storia del mobile inglese e francese è alla base di ogni nostra realizzazione; perchè solo la conoscenza della tradizione abbinata alle capacità manuali dei nostri maestri ebanisti può portarci a livelli di progettazione così alti.

La successiva digitalizzazione delle idee fa da indispensabile passaggio per la produzione.

The revisiting of the best periods of the history of the English and French piece of furniture it is the base of every realization of Cappellini Intagli, because only the knowledge of the tradition combined to the manual abilities of our cabinetmakers can bring us to so high levels.

The following digitization of the ideas is the essential passage for the production.

A large, three-dimensional wooden carving in a light, warm-toned wood. The central element is a scallop shell, from which several elegant, curved scrolls emerge. The carving is highly detailed, showing the texture of the wood and the depth of the carvings. It is positioned on a white surface, partially overlapping a black and white architectural line drawing of a similar, but more symmetrical, shell and scroll design. The background is a solid black, which makes the light-colored wood stand out. In the top left corner, the word "tail" is written in a white, elegant script font.

Le creazioni di Cappellini Intagli sono sinonimi di artigianalità nelle manifatture, cure infinite nei dettagli delle lavorazioni, rispetto delle tradizioni nelle tecniche di rifinitura, meticolosità nella selezione dei materiali.

Ogni mobile può così uscire dalla lavorazione unico e differente da ogni altro, in ragione della manualità che ne plasma la realizzazione.

The creations of Cappellini Intagli are synonymous of artisanship in the manufactures, cares in the details of the workmanships, respect of the traditions in the techniques of finishing, meticulousness in the selection of the materials.

Every piece of furniture can be different from every other, in reason for person who carry out it.

The art of gilding

Dal Rinascimento ad oggi, l'arte della doratura non ha mai perso il suo fascino: la materia si trasforma in espressione estetica, il legno in un valore senza tempo.

Una volta dorati, i decori vengono rifiniti con oli minerali e, la patina antica che si crea, conferisce al prodotto una naturale bellezza.

From the Renaissance to today, the art of the gilding has never lost its charm: the subject turns him into aesthetical expression, the wood in a value without time.

Once gilded, the decorations are finished with mineral oils and, the antique patina that is created, confers to the product a natural beauty.
